

Lab 8 Instructions – Multimedia

CIS 195, Web Authoring 1

Overview

The objective of this lab is to introduce you to adding audio and video to a web page. This information is covered in Tutorial 7 in your text.

Instructions

For each web page, try to just look at the picture in the book and then make your web page look like the picture. Look at the step-by-step instructions if you run into difficulty. If you have any questions or comments be sure to post them in the Q and A Forum.

Tutorial 7

Do tutorial exercise 7.1 on pages 483 through 501 of your textbook to create the *Jumbo Popcorn* web site, and exercise 7.2 on pages 502 through 521 to create the *Royal Wedding* web site.

Note that this web site uses a Java Applet which is now an obsolete technology. Your instructor will show you how to embed a web page inside a web page to create the list of credits instead of using the Java Applet.

Review

Create the *Fred Astaire web page* on pages 537 – 539 of your textbook.

This web page also uses a Java Applet which you can replace with an embedded web page.

Case Problem

Do either the Case 1 or Case 2 problem at the end of Tutorial 7. Don't do Case 3 or 4 since they use Java Applets.

Submitting your lab work

- Use an FTP app to upload your web pages to citstudent.
- Put the URLs for your web pages on citstudent¹ in a text file or word document and upload that using the *Production Version* assignment link² on Moodle.

Notes:

1. Test the URLs to make sure they work!
2. Don't zip your files and upload them to Moodle, they are too big and Moodle won't accept them.
