

Instructions for Lab 3 – CAMshots

CIS 195 Web Authoring 1

Introduction

You will be creating two web pages described in Tutorial 2 of our textbook, *HTML, CSS and Dynamic HTML*. For best results, read the explanations in the tutorial (but not the steps) before writing HTML code for your web pages. You might want to read a few pages and then try writing some code, read a few pages, then write some more code.

Starting files for this lab are in the *tutorial.02.zip* file on Moodle.

Part 1

Everyone does the same thing for this part, which is to:

- A. **Tutorial 2:** Create the *CAMshots* web page described in the tutorial.

Best Practice: Make the web page by just looking at the pictures of the completed pages and then trying to write HTML that makes a web page look just like the picture. If you run into difficulty, then look at the step by step instructions. In “real life” you wouldn’t have step by step instructions.

- B. **Review:** Add the Glossary web page to the CAMshots site. Again, it’s best to just look at the picture of the completed page and write HTML code to make a web page that looks just like the picture.

Part 2

Do any one of the case problems 1 - 3 for Tutorial 2.

Submitting your lab work

1. Zip the tutorial.02 folder along with it’s tutorial, review, and case subfolders.
2. Upload your tutorial.02.zip file using the *Production Version* assignment link on Moodle:
